

Canvas for Confluence Server User Guide

Organize and manage your content with Comala Canvas.

Watch this introductory video to see how you can use Comala Canvas boards and lists to visually create and manage your pages, projects, and tasks.

Canvas Boards

[Get Started with Boards ▶](#)

Boards are a fast and effective way for you to brainstorm and visualize your content and ideas.

- [Canvas Blueprints](#) let you quickly access boards:
 - Manage your team's tasks with [Tasks Canvas Blueprint](#).
 - Use popular business frameworks and boards with [Strategy Canvas Blueprint](#).
- [Insert and customize](#) your own Canvas board.
- Select from a range of business frameworks boards at [Canvas Exchange](#), including SWOT Analysis, Risk Management Matrix, and Product Experience Canvas.
- Use Canvas boards to brainstorm your ideas with [cards](#), add the details to [pages](#).

Canvas Lists

[Get Started with Lists ▶](#)

A list presents page properties in a table format.

- Categorize, manage and review your pages and labels.
- [Work with lists](#) to build requirements, manage labels and apply checklists to your Confluence pages.
- [Insert existing lists](#), like the Content Quality Checklist or Requirements List.
- [Create your own lists](#) and customized checklists.
