Lightweight Requirements Management workflow

- **v.67 requires 3.0.4 or newer**

**Categories:** Systems Development Life Cycle | Document Management

A simple lightweight workflow for managing Software Requirements.

- For each requirement page you can select the priority, category and owner, as well as to define links to the actors (users).
- To ensure consistency, the workflow has defined a template header.

**Lightweight Requirements Process**

- **Priority**
- **Category**
- **Actor**
- **Owner**

- **Not Started**
- **In Progress**
- **Rejected**
- **Complete**
- **Approved**
