

metadata-values macro

[\[Overview \]](#) [\[Usage \]](#) [\[Markup Reference \]](#) [\[Usage with the Comala Document Management app \]](#) [\[Related macros \]](#) [\[Related documentation \]](#)

Overview

The `{metadata-values}` macro that lists all of the metadata attached to a specified page.

The macro will only display the metadata defined on the page, not any metadata values retrieved from other pages.

Parameters

Parameter	Required	Default	Notes	Version
<code>page</code> (or unnamed first parameter)		@self	The individual content page to retrieve any added metadata and values. Default is to the current page.	
<code>orientation</code>		vertical	The tabular report is displayed either <ul style="list-style-type: none">• <code>orientation=vertical</code>• <code>orientation=horizontal</code>	

Usage

To list all the single metadata and metadata values on a page, choose the [Metadata values macro](#) from the Confluence macro browser:

Metadata values
Macro that lists all of the metadata attached to a specified page.

The macro editor allows you to configure the macro.

Insert 'Metadata values' Macro

Macro that lists all of the metadata attached to a specified page.

Page *

Use *@self* for the current page

Orientation

vertical

orientation=horizontal makes a report horizontal

Select macro Insert Cancel

The macro displays any metadata and their values on the specified page in a tabular format. The default page, if no page is specified, is the current page, `@self`.

Any metadata on the page will be displayed in the macro editor **Preview**, with the option to display the metadata in a vertical or horizontal table.

If there is no metadata added on the specified page, the **Preview** will display the following:

 No metadata is attached to page "@self"

This message is also displayed on the page.

Note that the macro does not list any space metadata added to the page - only metadata added using the `{metadata}` macro and the `{metadata-list}` macro.

Markup Reference

```
{metadata-values|orientation=horizontal}
```

This would display any metadata names and the values on the current page:

Name	email	Username	Team	Updated	Contact
Max Wall	bmwall@comala.com	mwall	QA Overlord	11/03/2019	mwall@comala.com

Usage with the Comala Document Management app

The `{metadata-values}` macro is partially supported by the Comala Document Management app at workflow level.

```
{metadata-values}
```

Do not use the macro with the `orientation` parameter at workflow level in the Comala Document Management app, for example `{metadata-values|orientation=horizontal}`. This is unsupported and will simply display an error.
