

# 6.14.2 Release Notes

12 Apr 2021

Comala Document Management 6.14.2 is a bug fix release.

[Feature Tour](#) | [Installation](#) | [Update / Change / Migrate](#) | [Support](#)

## Updates and bug fixes

- updated the page activity report page and page history to stop the display of the read confirmation popup when viewing these reports
- updated read confirmation checkbox to remain open if invalid credentials are inserted
- updated Document Report to improve clarity when displaying a **duedate** that has expired for a **state** and **approved ver**
- fixed a problem that duplicated global workflow templates when importing from backup
- resolved an error display issue when removing readers who had confirmed a read confirmation
- resolved an issue requiring a user to add a specific time when setting a new due date - if no time is added, time is now set to 00:00 on the day of the new due date
- resolved an issue allowing multiple assignees when using multiple approvals in a state
- resolved an error when a **Select** transition is removed from a state
- resolved an error display issue when an anonymous user views 'public' content
