

6.14 Release Notes

Comala Document Management 6.14

03 Feb 2021

Comala Document Management 6.14 is a feature update release

[Feature Tour](#) | [Installation](#) | [Update / Change](#) | [Support](#)

What's New

New Comala Document Actions Report

- The [Document Actions Report](#) replaces the 'Document Tasks' page in your User Profile and the Dashboard component

The screenshot shows a user profile for 'Sunni Conn' with a 'Document Actions' tab selected. Below the navigation bar, there is a section titled 'My Comala Document Management Actions'. A 'Type' dropdown menu is set to 'All'. A table lists three actions:

Action	Appears on	Due date
<input checked="" type="checkbox"/> Add MVP v1 features suni	Feature Specification (GMT)	10 days
<input checked="" type="checkbox"/> Technical	MSR Review (Documentation Management)	
<input checked="" type="checkbox"/> Team Leader Approval	Requirements Edit (Release and Deploy)	

A blue navigation bar containing a search input field with the text 'Search', a magnifying glass icon, a question mark icon, a speech bubble icon, and a user profile icon.

My Comala Document Management Actions

- Technical [MSR Review](#) (Documentation Management)
- Team Leader Approval [Requirements Edit](#) (Release and Deploy)
- Add MVP v1 features suni [Feature Specification](#) (GMT)

- It allows users to filter their pending approvals or Comala Document Management tasks in their user profile report **My Comala Document Management Actions**

The screenshot shows the 'Document Actions' report with the 'Type' dropdown set to 'Approval'. The table lists two actions:

Action	Appears on	Due date
<input checked="" type="checkbox"/> Technical	MSR Review (Documentation Management)	
<input checked="" type="checkbox"/> Team Leader Approval	Requirements Edit (Release and Deploy)	

- This new report has improved performance compared to the previous report and resolves some issues that users have previously experienced
- A global configuration option is provided to disable the Dashboard component if required, for example when you use a custom theme

Document Actions Dashboard Component

Enabled

Show User's pending Document Actions on the Confluence Dashboard.

After updating, an upgrade task should be initiated by a Global Administrator to ensure that all data required for the Document Actions report is available. See [Upgrade to 6.14.x](#) for more details.

Updates

- The `pdf-export` macro will now return success or failure events. See [pdf-export macro](#) and [Exporting to PDF with K15t PDF Exporter](#) for more information

Bug fixes

- Corrected approved version dates in reports
- Corrected the user links in the Document Report and [Document States Report macro](#)
- Fixed an issue with [Attribute References](#) when a user rejects then approves an approval
- Fixed an issue with the Loop Watchdog that resulted in workflows getting stuck in extreme cases
- Fixed an issue that meant the settings option in the [Document Report \(in the Space sidebar\)](#) was not available to some users in some versions of Confluence
- Fixed an issue related to the display of minimum approvers when there are multiple approvals for a single state
- Improved translations related to **Read Confirmation** status
- The `statechanged` trigger now works with the `initial=true` parameter
