

Workflow Reports

Overview

Comala Document Management app provides a range of default reports at the page, space, profile and global level.

For **Confluence 2.10 and later**, the audit report uses the native [Confluence Audit Log](#).

Reports

- [Activity Report - Content](#) — Page-level audit log of workflow and content interactions
- [Audit Logs - Space and Global](#) — DEPRECATED Track important workflow interactions at space and global level
- [Document Report - Space Sidebar](#)
- [Document Tasks - Profile](#) — A list of all your workflow tasks. This user profile report has now been replaced by the Document Management Actions Report from Comala Document Management v6.14
- [My Document Actions - Profile](#) — A summary of your pending workflow actions - assigned tasks and assigned reviews
- [Tasks Report - Space Tools](#) — Lists workflow tasks
