

Export to Word and PDF - Page Tools

Overview

Exporting to **PDF** or **Word** will respect the **Published** vs. **Draft** state of content when using [Same-space publishing](#).

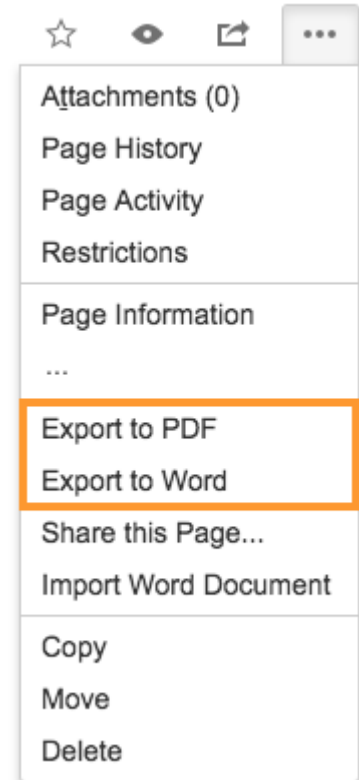

What is exported?

Workflow state type	Notes
No workflow	Latest version of content is exported
 Unrestricted workflow state	Latest version of content is exported
 Draft workflow state	Draft version being viewed is exported
 Published workflow state	Published version is exported

See [Status Indicator Circles](#) and [Publishing](#) for more information.

Draft state exports

When exporting content in a draft state, the state name will be displayed under the page title in the exported file.
