

6.15 Release Notes

Comala Document Management 6.15.0

12 May 2021

Comala Document Management 6.15.0 is a feature update release

[Feature Tour](#) | [Installation](#) | [Update / Change](#) | [Support](#)

What's New

New Document Stats macro

New [Document Stats report](#) to enable users to see a count of pages in each state.

document stats report

Created by admin, last modified just a moment ago

Editing	Approved	Published	In Progress	Posted	Expired	Review	Rejected
2	4	2	5	0	0	4	0

- the report has two rows and a variable number of columns
 - header row - state names
 - body row - a number count of pages in each state
- no filters, sorting or pagination required
- simple table format compatible with native Confluence chart macro - see <https://wiki.comalatech.com/display/CDML/Chart+macro>

If updating from a version prior to 6.14.0, after the update, an upgrade task should be initiated by a Global Administrator to ensure that all data required for the Document Actions report is available. See [Upgrade to 6.14.x](#) for more details.

Updates

- new [Document Stats report](#) enabling users to see a count of pages in each state (in the long-term the old 'workflow-report' macro will be deprecated)
- updated language translations

Bug fixes

- resolved a problem to remove completed tasks in the Dashboard and Document Actions report
- updated state dialog box to fully display long approval names
- fixed a problem when saving a workflow parameter due date using ISO8061 period
- fixed an issue when using the Support Console to generate a support package
- updated read confirmation to remove English for language translations from the read confirmation notification subject and description
- updated German translation for `read_ack` macro body
