

Edit Workflow - Page Tools

Overview

Use this feature to inspect and edit your workflow.

This feature is only available in [Page Mode](#).

Opening the editor

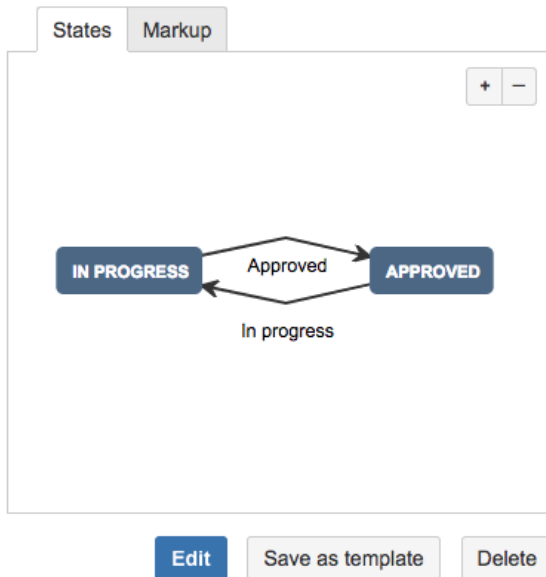

Choose **Page Tools** **Edit Workflow** to open the [Using Workflow Builder](#).

To edit the workflow markup, choose **Edit**, or select the **Markup tab**. Both do the same thing.

States and Triggers tabs

You will initially see the **States tab**, which contains a flowchart of the [States](#) and [Transitions](#) in your workflow.

If your workflow defines one or more [Triggers](#), you will also see a **Triggers tab** that summarises them.

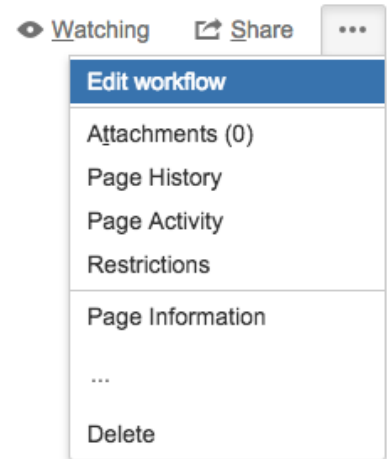

For more information on the **States tab** and **Triggers tab**, see: [Using Workflow Builder](#).

Markup tab

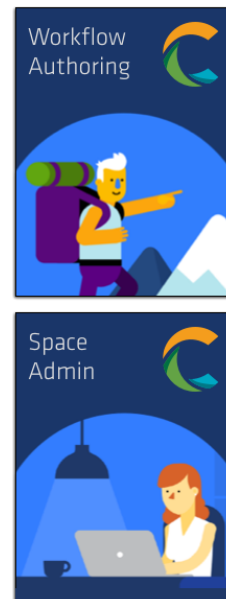

The Markup tab contains your workflow macro markup.

```
1 {workflow:name=Custom States Workflow}
2 {state:Editing|submit=Review}
3 {state}
4 {state:Review|approved=Published|rejected=Editing|updated=Editing}
5 {approval:Review}
6 {state}
7 {state:Published|final=true|submit=Review|updated=Editing}
8 {state}
9 {trigger:statechanged|state=Published}
10 {set-message:duration=PT1M}
11 Page published!
12 {set-message}
13 {trigger}
14 {workflow}
15
```
