

workflow-report macro

Looking for the reporter for use with ServiceRocket **Reporting for Confluence app**? See [workflow-reporter macro](#).

Overview

The `{workflowreport}` macro is used to create custom reports on workflow states, reviews and tasks.

Where to use it?

Optional.

One or more `{workflowreport}` macros can be used in wiki pages, blog posts, and, in some cases, comments.

It can also be used in any macro which supports **wiki content** in its *Macro body* (check macro documentation for details):

- [add-comment macro](#) — Comment on a page or blog post
- [increment-metadata macro](#) — Increment a metadata value to support custom versions (available from v6.11+)
- [pagefooter macro](#) — Add content to page footer
- [pageheader macro](#) — Add content to page header
- [send-email macro](#) — Send an email
- [set-message macro](#) — Add/remove a page message
- [workflow macro](#) — Defines a workflow template

Parameters

† Only use with `approvals` report

‡ Only use with `states` report

Parameter	Required	Default	Notes	Ver
<code>type</code>			What type of report should be displayed? <ul style="list-style-type: none">• <code>approvals</code> – Workflow Report Macro - Approvals<ul style="list-style-type: none">• The <code>approval</code> parameter must also be specified for this report to work• <code>dashboard</code> – Workflow Report Macro - Dashboard• <code>states</code> – Workflow Report Macro - States• <code>stats</code> – Workflow Report Macro - Stats• <code>tasks</code> – Workflow Report Macro - Tasks	
<code>approval</code> †			The name of a content review is required for the <code>type=approvals</code> report to work. The name is defined by the <code>{approval}</code> macro, and is shown in the Workflow Popup during Content reviews .	
<code>approver</code> †			Should the report be filtered to content that the specified user can currently review? <ul style="list-style-type: none">• Leave empty to include all content• Specify a username to filter to results which that user can review• Specify <code>@self</code> to filter to results that the current user can review	
<code>filter</code> †‡		<code>pending</code> †	† For <code>type=approvals</code> , which stage of the content review should the content be in? <ul style="list-style-type: none">• <code>pending</code> – the review is not yet complete• <code>approved</code> – the review was approved• <code>rejected</code> – the review was rejected ‡ For <code>type=states</code> , you can provide a comma-separated list of CQL filters in the form <code>FieldName:Value</code> – the values must be indexed. <ul style="list-style-type: none">• Workflow CQL Fields• Advanced Searching Using CQL (Atlassian)• CQL Field Reference (Atlassian)• CQL Function Reference (Atlassian)• CQL Keywords Reference (Atlassian)• CQL Operators Reference (Atlassian)• Performing Text Searches with CQL (Atlassian)	

hideheader		false	Should the report header be hidden? <ul style="list-style-type: none"> • Only applies to <code>type=dashboard</code> report • <code>true</code> – hide the header • <code>false</code> – don't hide the header 	
label			Should the report be filtered by content label(s)? <ul style="list-style-type: none"> • Leave empty to include all content • Specify one label name to filter to a specific label • List multiple label names, separated by commas, to filter to content with any of those labels <p>If using a list of labels, you can prefix the list with <code>&</code> (ampersand) to require that content has all the labels.</p>	
maxentries		20	The number of results to show per page.	
order		descending	What order should results be sorted in? <ul style="list-style-type: none"> • <code>ascending</code> – AZ • <code>descending</code> – ZA 	
parent			Should the report be filtered to a specific parent page and the child pages of the specific page? <ul style="list-style-type: none"> • Leave empty to include all content in the space • Specify a page title to include the specified page and its child pages • Specify <code>@self</code> to specify the current page 	
sort		modified	Which report column of the report should results be sorted by? <ul style="list-style-type: none"> • <code>modified</code> – the most recent date on which the content (page or blog post) was modified • <code>created</code> – when the review, state or task was created • <code>duedate</code> – the task or state expiry date • <code>pagestate</code> – the current workflow state • <code>statechanged</code> – the most recent date on which the state was changed • <code>statechangedby</code> – the user that most recently changed the state 	
spacekeys		current space	Which space(s) should be included in the report? <ul style="list-style-type: none"> • Leave empty to report on the current space • Specify one space key to report on a specific space • List multiple space keys, separated by commas, to report on multiple spaces • Specify <code>any</code> to report on all spaces – but you must also specify <code>approval</code> or <code>state</code> parameter, depending on the report <code>type</code> 	
state[‡]			Should the report be filtered to specific state(s)? <ul style="list-style-type: none"> • Leave empty to report on all states • Specify one state name to report on that state • List multiple state names, separated by commas, to report on specific states 	
user[‡]			Should the report be filtered to content that the specified user can currently review? <ul style="list-style-type: none"> • Leave empty to include all content • Specify a username to filter to results which the specified user can review • Specify <code>@self</code> to filter to results that the current user can review 	

 The macro has a 500-page limit for each report. If a larger report is required it may be useful to use the [CQL REST API](#).

App configuration

Setting	Where	Notes
Workflow Activity and Drafts Visibility	<ul style="list-style-type: none"> • Configuration - Space Tools • Configuration - Global 	<p>Who can access the report?</p> <p>For report-specific details, see:</p> <ul style="list-style-type: none"> • Workflow Report Macro - Approvals • Workflow Report Macro - Dashboard • Workflow Report Macro - States • Workflow Report Macro - Stats • Workflow Report Macro - Tasks

All examples

Content by label

There is no content with the specified labels
