

Upgrade from 3.1.x to 5.x

Reviewer (approval) assignment

In version 5.x:

- The user interface has also been significantly improved
- Reviewers can be assigned within the state that contains the approval
- New parameters provide greater control over which users can be assigned
- You can allow any Confluence user to be assigned as a reviewer

For more information see:

- [User Guide](#):
 - [Workflow Popup](#)
 - [Content reviews](#)
 - [Assigning reviewers](#)
- [Workflow Authoring Guide](#):
 - [Reviews](#)
 - [{approval} macro](#)
- [Examples](#):
 - [Assignment Examples](#)
 - [Reviewer Authentication](#)

States - Expiry dates

State expiry date and target state to transition to upon expiry are now set by the `duedate` and `expired` parameters respectively. See [{state} macro](#) for details.
