

Gliffy Diagrams for Confluence

Overview

This page describes how to integrate Gliffy [Diagrams for Confluence app](#) with Comala Document Management app.

You will need Gliffy Diagrams for Confluence version 6.5.3 or above.

Gliffy Diagrams is compatible with Comala Document Management [same-space publishing](#).

Step 1: Use Comala Document Management (formerly Comala Workflows) 4.5 or above

In Comala Document Management v4.5 we added the following compatibility with Gliffy Diagrams

- The correct version of the Gliffy Diagram will be shown when viewing the Published (*final*) version of a page
- Editing the Gliffy Diagram from the Published view will edit the latest version of the Gliffy Diagram

In Comala Document Management v4.6.1 we added further compatibility with Gliffy Diagrams

- Resolved issues encountered if draft and published Gliffy Diagrams were different sizes

Known issues

Note: When viewing the published version, links in the Gliffy Diagram may be incorrect if they have been moved since the page was published. We are working with Gliffy to resolve this issue.
