

# Blueprints

Blueprints provide you with ideas and structure so you can get started in Confluence right away. Choose from a range of page Blueprints including [Product Requirements](#), Risk Template for Risk Matrix and Requirement Page template.

## Attaching Workflows to Blueprints

An administrator can attach a workflow to a Blueprint in the **Blueprints Templates** under the **Templates** tab in **Content Tools**.

The screenshot shows the 'Space Tools' interface with the 'Content Tools' tab selected. Under 'Content Tools', the 'Templates' sub-tab is active. The 'Blueprint Templates' section is visible, listing various blueprints. The 'Attach Workflow' button for several blueprints is circled in red.

Blueprint Name	Actions
<b>JIRA Report Blueprint</b>	Promote · Disable
Snapshot JIRA Report Template	Edit · <b>Attach Workflow</b>
Dynamic JIRA Report Template	Edit
Status Report Template	Edit
JIRA Reports Index	Edit
<b>Product Requirements Blueprint</b>	Promote · Disable
Product Requirements	Edit · <b>Attach Workflow</b>
Product Requirements Index	Edit
<b>Share Links Blueprint</b>	Promote · Disable
Share a Link	Edit · <b>Attach Workflow</b>
Shared Links	Edit
<b>Decisions Blueprint</b>	Promote · Disable
Decision	Edit · Detach Workflow
Decision register	Edit
<b>File List Blueprint</b>	Promote · Disable

Once attached, workflows approvals, tasks, notifications and workflows functionality will be applied to each new Blueprint created through the **Create** button. By completing designated tasks, reviews, and approvals your page status automatically moves forward.
