

6.3 Release Notes

Comala Workflows 6.3

16 Jul 2019

Comala Workflows 6.3 is a minor feature update release.

[Feature Tour](#) | [Installation](#) | [Update / Change / Migrate](#) | [Support](#)

What's New

In this release we've fixed a bunch of UI bugs and made some minor updates. We have removed a bunch of legacy UI dependencies on the workflow page dialog and made some improvements to the consistency of error messages on the parameter entry screen.

Fixes and updates

- Fixed a problem with View Workflow in the Space Tools - Workflows Configuration page.
- Fixed a problem where assignees in approvals were not persisted in Workflow Builder.
