

# Seibert Media Draw.io Diagrams for Confluence app

## Overview

This page describes how to integrate Seibert Media [Draw.io Diagrams for Confluence app](#) with Comala Document Management app.

You will need Draw.io app **version 6.3.4.0 or above**.

## That's it!

We've integrated with the app to ensure it functions correctly with Comala Document Management, and, in particular, that correct versions and sizes of the Draw.io diagrams are shown when switching between Published and Draft state content when using [Publishing](#) features of Comala Document Management.
