Overview

You can define a board's properties in **Board properties** dialogue box in the [board editor](#)

- board name
- board description
- types of card supported (cards and/or card-pages)
- the maximum number of cards that will be viewed in a board container
- board alignment
- set board container heights to match across a row or the whole board
- display of board description on published board
- notifications to page watchers of board changes
- hide/display option for users to clear the board of all cards

Edit the board properties

On a page with an existing board macro:

- **Edit** the page.
- choose **Edit** the Comala Board macro.

Select the **Board properties** option in the drop-down menu [board editor](#) to open the board's properties.
