

Report on states

These are the ways you can keep track of workflow states...

At a glance

On the content, the current state is shown in the [workflow status bar](#)

Document Project

Created by admin, last modified just a moment ago Polishing 3 Tasks

A [filled circle](#) means you as the current user, are assigned to a [content review](#) in that state.

Document Project

Created by admin, last modified 6 minutes ago, pending approval — Review 3 Tasks

- the default color for each workflow status indicator circle is blue. This indicates that there is no workflow restriction for view only users
- the colored state indicator circle will be green if the current state has been defined as the [final state](#) in the workflow
- with a [final state](#) in the workflow, the indicator circles for all other states in the workflow are colored orange and considered as workflow draft states (unless a custom state color has been added)

In detail
