

6.11.3 Release Notes

25 Jun 2020

Comala Document Management 6.11.3 is a bug fix release.

[Feature Tour](#) | [Installation](#) | [Update / Change / Migrate](#) | [Support](#)

Updates and Bug fixes

- Fixed an issue where switching workflows in a space was preventing the workflows dialog from opening.
- Fixed a bug introduced in the 6.11 release where the `set-metadata` action was not correctly setting values by reference
- Changing the due date on an approval through the user interface was saved but not shown correctly when editing it.
- Fixed an issue where read confirmations on blog posts were not expiring.
