

# Customize a board container

## Customize a container

An individual container color scheme can be customized and an icon added.

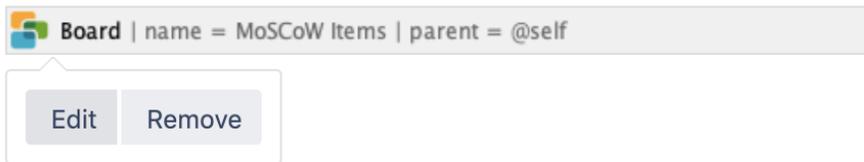

- [Edit a container color scheme](#)
- [Add or change a container icon](#)

Containers are edited and added to the board using the [board editor](#).

You can also [edit a container name](#), [add a description](#) and [one or more labels](#).

## Edit a container

Choose **Edit** the page and select the option to edit the Comala Board macro.

Use the **Design** tools in the [board editor](#) to add a container color scheme or a container icon.

## Edit Board - MoSCoW Items

[Help](#)

A screenshot of the 'Edit Board - MoSCoW Items' interface. At the top, there is a toolbar with various icons for editing. Below the toolbar, there are four columns representing MoSCoW categories: 'Must have' (purple), 'Should have' (blue), 'Could have' (yellow), and 'Requ...' (red). Each column has a title, an icon, a description, and a label. A dropdown menu is open on the right side, showing options: 'Design board', 'Board properties', 'Board filters', and 'Board markup'. At the bottom, there is a status bar with the text 'Comala Boards — You will update the board in the current page' and two buttons: 'Close' and 'Apply'.

## Edit a container color scheme

Use the design tool icon to choose a color scheme for a selected container.

- [Add, delete and move board containers](#)

**Edit color scheme**

- the icon will display the current color scheme for the chosen container
- opens the drop-down menu to select a color scheme for the individual container.

- choose a new color scheme from the drop-down palette options.
- select **Apply** in the board editor to add to the board macro.

## Add or change a container icon

An image can be added as an icon to help identify each container.

The icon can be selected by:

- selecting from a palette in a drop-down menu in the board editor.
- adding a URL to link to an image for the icon.

Use the design tool icon to choose or change an icon for a selected container.

**Edit container icon**

- the container icon tool will display the chosen container icon.
- if the container has no current icon the icon tool image defaults to a *smiley emoji*.
- choose the container icon to view a palette of container icon options in a drop-down window.
