

# RefinedWiki Refined Theme for Confluence

## Overview

This page provides information for integrating [Refined Theme for Confluence -Sites and Themes app](#) with Comala Document Management.

You will need Refined Theme **version 4.2.13 or above**.

## Document Management Tasks on Dashboard

To add the Comala Document Management Tasks panel to the Confluence Dashboard, please add the [Workflow Report macro](#) with "**type**" parameter set to **dashboard**.

All other features should work by default.

## Workflow status missing from top of page?

If you don't see the workflow status (current state, tasks, etc) at the top of pages, enable the Meta Information in the theme.
