25 Apr 2022

Comala Document Management 6.16.13 is a minor update and bugfix release.

[Feature Tour](#) | [Installation](#) | [Update / Change / Migrate](#) | [Support](#)

Updates

- updated libraries for improved stability and performance

Bugfixes

- resolved a problem on a read confirmation **duedate** expiry causing a user that had already confirmed reading the request to be notified by the default read reminder on the expiry
- clearing workflow history will now clear on-page workflow messages (set using the `set-message` macro) and ensure that they do not display when applying a new workflows
