### What's New

Unable to render {include} The included page could not be found.

### Other Updates and Bug fixes

- Fixed an issue preventing the confluence page gadget rendering correctly when a workflow is active on a page.
- UX/UI updates including:
  - Improved the error handling display when there is a problem with the maximum number of assignable users.
  - The progress bar is now always visible in the workflow dialog.
  - Now it is possible to perform actions in the status dialog (if any available) of the published view.
  - Style updates on the page activity filter buttons to match the new look in Confluence 6.7
